PROFESSIONAL SUMMARY

Computer Science undergraduate (Miva Open University, starting January 2027) and NIIT-trained software developer seeking a software engineering internship. Builds responsive, scalable products with React, Next.js and TypeScript on Spring Boot, Node.js, Express, PostgreSQL and MongoDB backends. Built Foreman, a real-time collaborative whiteboard, and Pinnacle Inc, a fintech paper-trading platform with a live portfolio dashboard and order desk backed by real market data, and shipped a production e-commerce storefront for a Nigerian fashion brand end to end. Hackathon winner at NIIT Ikeja.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, React Native
Backend & APIs: Java, Spring Boot, Node.js, Express, API integration, PostgreSQL, Supabase, MongoDB
Tools & Workflow: Git, GitHub, GitLab, Docker, Kubernetes, Postman, Claude Code
Additional: Python, C, Rust, Solidity, Kafka, pandas, NumPy, PyTorch, OpenCV

EXPERIENCE

Frontend & Backend Developer 2025 – 2026
UNICCREATIONS | Lagos, Nigeria

- Shipped a live e-commerce storefront for a Nigerian fashion brand as the sole engineer, driving 100+ sales through the site and owning frontend, backend and every release from design to production.
- Built the shop, custom-order, account and delivery flows end to end, simplifying how customers buy and how orders reach them, without the brand hiring a separate designer or backend developer.
- Delivered a responsive interface matched to the design reference on every page and screen size, keeping product cards, filters, navigation and typography consistent across the site.

PROJECTS

Pinnacle Inc | Fintech Paper-Trading Platform 2025 – Present
React, Next.js, TypeScript, Java, Spring Boot, PostgreSQL

- Built a paper-trading platform that lets African investors practise risk-free with a $10,000 virtual balance across 12+ stocks, ETFs and Nasdaq-listed names, a market many cannot easily access with real money.
- Built a live portfolio dashboard that refreshes prices in ~230 ms and revalues positions and account equity in real time, so users see the true result of every trade.
- Built an order desk that places and records trades against live market data from third-party APIs, backed by a Spring Boot and PostgreSQL service.

Foreman | Real-Time Collaborative Visual Workspace 2026
Next.js, React, TypeScript, Supabase (PostgreSQL), Tailwind CSS, Playwright

- Built a real-time collaborative whiteboard where teams brainstorm, plan and diagram together, with sticky notes, shapes, arrows, freehand drawing, comments, an activity feed, six starter templates and PNG export.
- Designed a Supabase/PostgreSQL backend with Row Level Security and Owner/Editor/Viewer roles enforced in the database, routing every write through permission-checked database functions.
- Engineered a sync engine in which no edit is lost or duplicated: an offline queue replays changes on reconnect, the server applies each retried operation exactly once, and per-object versioning resolves conflicts.
- Load-tested collaboration with 200+ concurrent test users on a single server, and verified the database rules and multi-user editing with automated tests (Playwright, Vitest, PGlite).

ProDesign Africa | Architecture & CAD Web App 2026 – Present
React, Next.js, TypeScript, Tailwind CSS, Java, Spring Boot

- Built a 3D architecture/CAD web tool in Next.js and TypeScript for African professionals, with Nigerian plot standards and ARCON/LASDRI compliance built in.
- Implemented an interactive in-browser floor-plan editor, styled with Tailwind CSS, for producing scaled, compliant building drawings.

EDUCATION

Miva Open University Starting Jan. 2027
B.Sc. Computer Science, focusing on software engineering, data structures and algorithms, and database systems

NIIT Ikeja | Lagos, Nigeria Sept. 2024 – Dec. 2026
Diploma in Software Development

ACHIEVEMENTS & CERTIFICATIONS

- **Hackathon Winner, NIIT Ikeja** – Won the hackathon presentation, pitching and demoing a software solution to a judging panel.
- **JPMorgan Chase & Co.** – Software Engineering Job Simulation (Forage), 2026.
